Getting Started

Dear customer,

Congratulations with your purchase!

Some information to get you started:

- Your **OPNsense**® appliance has been pre-installed with the open source OPNsense software[1].

- This Getting Started and other resources for your product can be downloaded from
  https://www.deciso.com/resources

- The Ethernet ports of the appliance are assigned as follows:
    - Port 0 is assigned to LAN with IP address 192.168.1.1
    - Port 1 is assigned to WAN and uses DHCP
    - Other ports are not configured

- The supplied USB-cable can be used to gain console access (settings are: 115200 8N1).
  Console access is restricted with a login. Use the user and password:
  user: root   *password:* opnsense

- To get access to the web interface (default IP: 192.168.1.1) use the web user and password:
  web user: root   *password:* opnsense

- For more detailed information and configuration settings please consult the OPNsense website at
  https://opnsense.org/

We expect you will find this product fitting your needs perfectly.

If you have any questions regarding your purchase, please contact sales@applianceshop.eu

With kind regards,

Deciso Team
