

OPNsense® 24.7 'Thriving Tiger': Celebrating 20th Major Release with Advanced Security and Unmatched Performance

Middelharnis, the Netherlands, July 25, 2024 - Deciso® is thrilled to announce the release of OPNsense® 24.7 'Thriving Tiger', marking the 20th major community edition. This milestone reaffirms OPNsense's commitment to providing cutting-edge, secure, and high-performance open-source firewall and routing solutions.

Key Highlights of OPNsense® 24.7 'Thriving Tiger'

- **FreeBSD 14.1:** Leveraging the latest FreeBSD 14.1, OPNsense® 24.7 ensures a stable and secure foundation, significantly enhancing system performance and compatibility.
- **Performance Increase:** Major performance improvements have been implemented, ensuring faster, more efficient processing and a smoother user experience.
- **Modern New Dashboard:** Users can now enjoy a sleek and intuitive dashboard, designed for ease of use and enhanced user experience, reflecting the latest trends in UI/UX design.
- **Enhanced VPN Technologies**
 - **WireGuard:**
 - **Performance Boost:** Significant increases in connection speeds and reliability, enhancing overall user experience.
 - **QR Code Generation:** Simplifies mobile client configuration with QR code generation, enabling quick and secure setup.

- **OpenVPN:**
 - **Data Channel Offload (DCO):** Introducing revolutionary performance improvements for VPN servers and clients, significantly boosting throughput and efficiency.
- **MVC Migrations and API Enablement:**
 - **GIF and GRE Interfaces:** Migration to the MVC framework and API enablement now includes GIF and GRE interfaces, providing more flexibility and control for network configurations.
 - **NAT 1-to-1:** The MVC migration also includes API support for NAT 1-to-1, streamlining network address translation processes and enhancing network management.
- **DHCPv6 Improvements:** Enhancements in DHCPv6 include better tracking of WAN in DHCPv6 mode, providing improved management and configuration options for IPv6 networks.

"With the release of OPNsense® 24.7 'Thriving Tiger', we are celebrating a significant milestone and reaffirming our commitment to delivering state-of-the-art security solutions. This release is packed with features that enhance performance and provide our users with a more powerful and intuitive experience," said Robert van Papeveld, CEO of Deciso.

These updates ensure that OPNsense remains at the forefront of open-source security solutions, providing a reliable and intuitive platform for managing network security. Emphasizing modern performance enhancements and user-friendly features aligns with current tech trends, making this release highly relevant in today's digital landscape.
